

## Your total GPS platform for field data collection

The Trimble® GeoXT™ handheld from the GeoExplorer® 2008 series is the essential tool for maintaining your GIS. A high performance, submeter GPS receiver combined with a rugged handheld computer, the GeoXT handheld is optimized to provide reliable location data, when and where you need it.

It's ideal for use by utility companies, local government organizations, federal agencies, or anyone managing assets or mapping critical infrastructure who needs accurate data to do the job right—the first time. With EVEREST™ multipath rejection technology onboard, the GeoXT handheld delivers consistent submeter real-time and postprocessed accuracy, so you know your GIS has the information that others can depend on.

With a powerful 520 MHz processor, 128 MB RAM, and 1 GB of onboard storage, the GeoXT handheld is a high performance device designed to work as hard as you do. The handheld gives you all the power you need to work with maps and large data sets in the field, and its high resolution VGA display allows for crisp and clear viewing of your data.

With the GeoXT handheld you have the flexibility to work exactly the way you want to. The handheld is powered by the industry-standard Windows Mobile® version 6 operating system, so you can choose a software solution designed for your field requirements, whether off-the-shelf or purpose-built. And you can use the built-in wireless LAN connection to access your organization's secure network and get the most up-to-date information. With Bluetooth® wireless technology, the GeoXT handheld offers wireless connection to a Bluetooth-enabled cellular phone for access to the Internet to receive real-time corrections from a VRS™ network and background map data. You can also wirelessly connect to other devices such as Bluetooth-enabled laser rangefinders and barcode scanners for convenient cable-free solutions that keep you productive in the field.

Rugged design and powerful functionality are the hallmarks of the GeoExplorer® series. When accuracy is critical, the GeoXT handheld delivers—with unprecedented efficiency and reliability, when and where you need it.

## Key features:

- High-performance submeter GPS with integrated SBAS and EVEREST multipath rejection technology
- High-resolution VGA display for crisp and clear map viewing
- Bluetooth and wireless LAN connectivity options
- 1 GB onboard storage plus SD slot for removable cards
- Windows Mobile version 6 operating system
- Rugged handheld with all-day battery
