

Hydrographic Survey, Barge Positioning & Cathodic Protection Survey Works

PROJECT OWNER

CLIENT

Geometra International (Private) Ltd. was awarded “Hydrographic Survey, Barge Positioning & Cathodic Protection Survey” as a sub-contractor for the survey works for “Bukom SBM 48” Subsea Pipeline Repair Project”.

The project was granted to Geometra by Leighton Offshore Pte Ltd. The contracted value of the project was USD 750,000.00 and the contract duration was for 11 months.

The project was developed by Shell Eastern Petroleum, with Leighton Offshore Pte Ltd. as the Consortium leader and Boskalis Offshore as the Consortium partner. The project location was Shell Bukom Refinery located on the Bukom islands.

The scope of work for Geometra included pre-construction survey as per the survey corridor, positioning survey for pipe lay barge and crane barge, survey for installation on SPM and PLEM, pipeline external cathodic protection survey using a towed fish.
