

INTERIM BATHYMETRIC SURVEY FOR THE PASIR PANJANG TERMINAL PHASE 3 & 4 RECLAMATION PROJECT

PROJECT OWNER

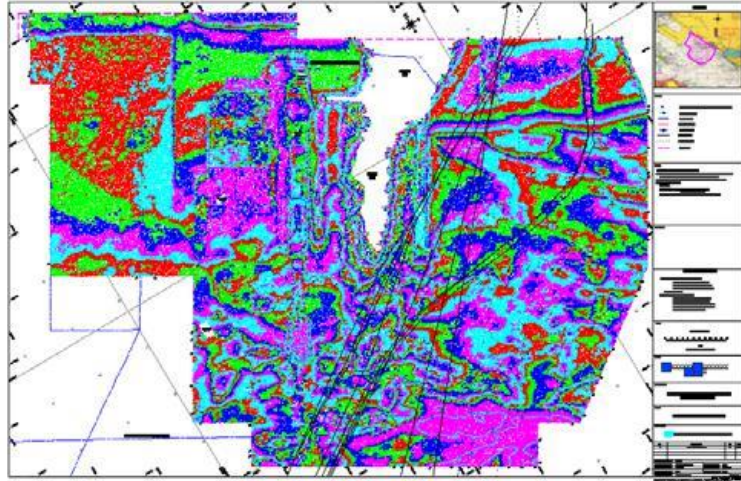

CLIENT

Geometra has been appointed as the survey contractor for interim surveys of the Pasir Panjang Terminal Reclamation project. Geometra was appointed by a consortium whose majority partner is Japan's Penta-Ocean Construction Co. The project is to construct container berths at phase 3 & 4 development of Pasir Panjang Terminal (PPT). The contracted value of the full project is S\$1.92B (US\$1.27B) and it is owned by PSA Singapore Terminals. The other partners in the joint venture are Koon Construction & Transport Co of Singapore, Hyundai Engineering & Construction Co of South Korea and Van Oord Dredging and Marine Contractors of Netherlands.

As per the project specifications Geometra's scope of work in the above project was to carry out bathymetric (Multi Beam Echo Sounder) monitoring interim survey in the designated areas on three monthly recurring basis. The purpose of the survey is to monitor the progress of reclamation work.

The survey is carried out in the field using the fully equipped survey vessel “Geometra Surveyors” which is crewed by highly qualified surveyors and engineers. The post processing, charting, plotting and final documentation work is to be done at facilities of Geometra Head Office in Singapore.
